

CD Comfortjet trains

In 2025, Czech Railways (CD) are introducing fixed-formation push-pull Comfortjet trains built by Siemens onto the Berlin-Prague route, Comfortjets will also eventually turn up on Prague-Vienna. Initially they will run without their restaurant car, with a classic restaurant attached at the first class end of the train. In late 2025 when Siemens delivers the Comfortjet restaurants, Comfortjet trains will have the formation and layout shown below.

To see if your train is a Comfortjet or not, make a dummy booking at www.cd.cz. Select *Purchase reservations only* then look for *Select seat from the seating map*. Or look up your train number at www.vagonweb.cz/razeni/.

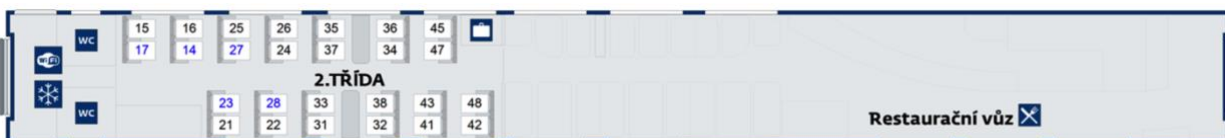

1st class

1st class

Restaurant car

2nd class
